	Title
1	Method and apparatus for providing automated searching and linking of electronic documents
2	Scanning and outputting textual information in web page images
3	Anchor based automatic link generator for text image containing figures
4	METHOD AND APPARATUS FOR DISPLAYING AN OPERATOR INPUT IN AN IMAGE USING A PALETTE DIFFERENT FROM THE IMAGE PALETTE
5	Access system
6	Apparatus for preparing a hyper-text document of pieces of information having reference relationships with each other
7	Method and system for providing alternatives for text derived from stochastic input sources
8	Application data error correction support
9	Object-oriented editor for creating world wide web documents
10	Method of creating individually customized videos
11	Video cataloger system with hyperlinked output
12	Video cataloger system with synchronized encoders
13	STORED-MEDIA INTERFACE ENGINE PROVIDING AN ABSTRACT RECORD OF STORED MULTIMEDIA FILES WITHIN A MULTIMEDIA COMMUNICATION CENTER
14	System and method for providing merchant information and establishing links to merchants while presenting a movie
15	System and method for linking and presenting movies with their underlying source information
16	System and method for enabling the creation of personalized movie presentations and personalized movie collections
17	Document management system
18	Structured document preparation apparatus and structured document preparation method
19	Document information management system
20	System and method for indexing, searching, identifying, and editing portions of electronic multimedia files
21	Method and apparatus for linking designated portions of a received document image with an electronic address

	Inventor

	Title
1	Method and apparatus for distributing over a network unsolicited information to a targeted audience
2	System and method for remote control of consumer electronics over data network with visual feedback
3	Method of servicing data access requests from users
4	Recommender system and method
5	DISTRIBUTED SERVICE NETWORK SYSTEM CAPABLE OF TRANSPARENTLY CONVERTING DATA FORMATS AND SELECTIVELY CONNECTING TO AN APPROPRIATE BRIDGE IN ACCORDANCE WITH CLIENTS CHARACTERISTICS IDENTIFIED DURING PRELIMINARY CONNECTIONS
6	Shopping assistance method and apparatus
7	Shopping assistance service
8	Document producing support system
9	Hyperlinked search interface for distributed database
10	System and method for dynamically translating HTML to VoiceXML intelligently
11	System for purchasing postage electronically in a distributed processing environment
12	System for printing facsimile jobs with a property profile
13	Soliciting information based on a computer user's context
14	Linking of computers based on steganographically embedded digital data
15	ADVERTISING EMPLOYING WATERMARKING
16	Linking of computers based on steganographically embedded digital data
17	System and method of dynamically generating an electronic document based upon data analysis
18	Method and system for conducting a contest using a network
19	Watermarked business cards and methods
20	Methods and apparatus for network-enabled virtual printing
21	Linking of computers based on optical sensing of digital data

	Title
22	Methods and apparatus for print scraping
23	Method and system for accessing information on a network using message aliasing functions having shadow callback functions
24	Method and apparatus for creation, distribution, assembly and verification of media
25	Method for conducting a contest using a network
26	Method for conducting a contest using a network
27	Picture archiving and communication system
28	System for vending products and services using an identification card and associated methods
29	System for data mining using neuroagents
30	System, method and article of manufacture for creating a filtered information summary based on multiple profiles of each single user
31	System and method for categorizing, aggregating and analyzing payment transactions data
32	Computer functional architecture and a locked down environment in a client-server architecture
33	Method and apparatus for synchronizing, displaying and manipulating text and image documents
34	System, method, and computer program product for displaying and processing notes containing note segments linked to portions of documents
35	Computer based system, method, and computer program product for selectively displaying patent text and images
36	System, method, and computer program product for generating equivalent text files
37	System, method, and computer program product for generating documents using pagination information
38	System and method for creating and manipulating notes each containing multiple sub-notes, and linking the sub-notes to portions of data objects
39	System, method, and computer program product for accessing a note database having subnote information for the purpose of manipulating subnotes linked to portions of documents
40	Adaptive pattern recognition based control system and method
41	System, method, and computer program product for patent-centric and group-oriented data processing
